Hamada Ahmed

Founder @ Focusera | The Field Expert | Helping Food SMEs build profitable QMS & Food Safety Systems | ISO 22000 - HACCP - BRCGS-TQM | AI-enabled Quality | 14+ yrs Ops
Al Jizah, Egypt

Summary

As Co-Founder of Focusera Academy, I bring over a decade of experience in Quality Management, specializing in the food industry. My mission is to empower quality professionals and organizations to bridge the gap between academic theory and practical field applications. With expertise in TQM, 7 QC Tools, and data analysis, I design tailored learning experiences and corporate training programs that foster quality culture and drive operational excellence. I also serve as an Independent Quality Consultant & Trainer, helping SMEs build efficient and audit-ready quality management systems, with a focus on ISO 22000, FSSC, and HACCP compliance. My approach leverages Lean methodologies and AI-powered tools to reduce waste, streamline processes, and improve product consistency. Dedicated to practical and actionable solutions, I am passionate about equipping the next generation of quality professionals with the skills needed to become strategic leaders in modern manufacturing.

Experience

Focusera Academy

Co-Founder

March 2015 - Present (11 years 7 months)

As Co-Founder, I don't just deliver training; I design learning experiences that bridge the gap between "Academic Theory" and "Factory Reality."

My mission is to transform ambitious individuals into "Field Experts" and help organizations build internal quality cultures.

Key Contributions:

- Mentored 500+ Quality Engineers & Managers across MENA, helping them move from routine inspection roles to strategic leadership.

- Designed "The Field Expert Roadmap," a practical curriculum covering TQM, 7 QC Tools, and Data Analysis for modern manufacturing.
- Developed customized corporate training programs that resulted in measurable improvements (cost reduction & process efficiency) for client companies.
- Bridged the gap for fresh graduates by teaching practical, hands-on skills often missed in university degrees.

Focus: Practicality over Theory. If you can't apply it on Monday morning, I don't teach it.

Areas of Expertise:

Total Quality Management (TQM) Implementation
 Continuous Improvement Strategies
 ISO 9001 Certification & Compliance
 Process Optimization & Standardization
 Customized Training & Development Programs
 Quality Audits & Risk Management

I am dedicated to helping businesses thrive by integrating best practices that reduce costs, increase productivity, and ensure long-term sustainability.

Freelance

Independent Quality Consultant & Trainer
 August 2015 - Present (11 years 2 months)

Providing specialized consultancy and high-impact workshops for individuals and SMEs.

- Consulting: Helping food SMEs build "Audit-Proof" Quality Systems (ISO 22000/FSSC) that streamline operations instead of complicating them.
- Training: Delivering interactive workshops on "Quality of Life" (Kaizen for personal life) and "Continuous Improvement Mindset."
- Digital Products: Creating tools and resources to help professionals digitize their quality processes.

EGEU Foods - The Egyptian European Co. for Food Products
 Quality Manager
 December 2024 - June 2025 (7 months)
 Egypt

Department: Quality Assurance & Control

Reports To: Plant Director

Plants Covered:

Spices & Dry Mixes Manufacturing Plant

Sauces, Ketchup, Mayonnaise & Vinegar (Liquid Products) Manufacturing Plant

Led the Quality & R&D transformation across two plants (Spices/Dry Mixes & Liquid Sauces/Condiments), moving from reactive inspection to proactive systems.

Key Achievements:

- Built & Mentored a High-Performance Team: Transformed the QA/QC department into a strategic partner for production, not just "police."
- R&D Innovation: Collaborated to validate new product formulations, improving shelf-life stability and reducing customer complaints.
- System Integration: Harmonized ISO 22000/FSSC 22000 & HACCP systems across both plants, ensuring full compliance with SFDA & NFSA requirements.
- Warehouse Optimization: Implemented strict FIFO and storage standards that reduced non-conforming stock waste.
- Data-Driven Quality: Shifted decision-making from "guessing" to "data analysis" using KPIs and trend monitoring.

Nature's Rule

Quality Manager

June 2022 - September 2023 (1 year 4 months)

Egypt

Managed Quality & Food Safety operations with a focus on establishing a strong foundational system.

Key Impacts:

- Established the FSMS/QMS baseline, preparing the facility for successful audits and certifications.
- Reduced Waste: Implemented strict raw material inspections and process controls that minimized production rejections.
- Customer Feedback Loop: Created a direct channel to analyze customer feedback and translate it into immediate production improvements.
- Culture Building: Trained production staff on "Quality at the Source," reducing errors at the operational level.

El Rashidi El Mizan Olayan Group (Jam Company)

7 years 2 months

Quality Control Team Lead

January 2021 - May 2022 (1 year 5 months)

6 October

Spent 7+ years on the shop floor of one of Egypt's leading food brands, mastering the art of "Field Quality."

- Led QC teams across multiple lines (Jam, Honey, Tomato Paste), ensuring product safety and consistency.
- Crisis Management: Handled real-time production deviations and non-conformities (NCRs) to prevent market recalls.
- Audit Leadership: Played a key role in maintaining ISO, BRC, and HACCP certifications through rigorous internal audits and documentation control.
- Innovation: Worked closely with R&D to set realistic specifications for new products and packaging materials.
- Training: Conducted hygiene and food safety training for hundreds of workers, simplifying complex concepts for the shop floor.

Senior Quality Control Engineer

April 2015 - December 2020 (5 years 9 months)

6 October

Responsible for controlling (all production processes, control points and critical control points) and make sure they conform to standard specifications and to take corrective action if there is any deviation in the production stages (Jam - Honey and Tomato Paste) .

- Physio-Chemical, Sensory evaluations for raw materials & finished products
- Routine QC checks for on-line process inspections for CCPs & semi-processed products
- Maintains all the Quality Records for RM/PM/FGs/In-process/Batch processing, etc.
- Participate in plant GMP / Internal Audits for food safety program
- Track the reasons of the non-conformances, and ensure that corrective and preventive actions are initiated by appropriate department
- Ensure process quality control points (QCP) are maintained during all stages of production
- Maintain & monitor Pest Control Program for the plant
- Conduct training programs & seminars for plant employees, to create awareness about, personal hygiene, food handling, product quality & safety

- Prepare & Implement Specifications for RM / PM and FG as per the required standards, co-coordinating with R & D / Product Development group
- Maintain Hold and Reject reports and follow on monthly basis
- Control Sample room monitoring and checking on daily basis
- Handling and controlling the quality documents as a part of ISO, BRC and HACCP
- Monitoring off line job
- . Test Samples PH , Prix , Temperature and Texture and other quality tests

El Rashidi El Mizan Gozour -Citadel Subsidiary (Sesame and Halawa Company)

Quality Control Engineer

February 2010 - April 2015 (5 years 3 months)

6 October City

Responsible for controlling (all production processes, control points and critical control points) and make sure they conform to standard specifications and to take corrective action if there is any deviation in the production stages.

1 - I make sure that everything from raw materials to finished products meets quality and safety standards

2- I visit the factory floor to take samples of products and inspect production, and to discuss problems with colleagues.

3 - I'm responsible for the documentation of inspection and tests conducted on products of a company.

4- Also I'm responsible of QC inspector to ensure the quality of purchased goods as well as finished goods.

5 - I recommend the reprocessing of the low quality products.

6 - I'm responsible to identify the problems and issues regarding quality of the products and also has to make recommendation to the higher authorities.

PICO Modern Agriculture Company

IPM Engineering

November 2007 - February 2010 (2 years 4 months)

Started my career in the field (literally), managing Integrated Pest Management (IPM) for grapevines. This role taught me the importance of preventive measures and root cause analysis in a biological environment.

Education

Azhar Univ. Faculty of Agriculture

Bachelor's degree, Microbial biotechnology · (2002 - 2006)
